

# A professional job always

All Certified Installation Partners are trained and monitored under strict guidelines introduced by TERREAL to ensure a professional approach to re-roofing your home. The simple steps to re-roofing your home are depicted below:

1 | Roof inspection by Terreal Certified Installation Partner

2 | Customer to specify requirements and quotations provided thereafter.

3 | Arrival of roofing materials, equipment and necessary transport.

4 | Dismantle existing old roof tiles, portion by portion.

5 | In case of raining, exposed roof will be covered with canvas.

6 | Dispose old tiles into a disposal bin.

7 | Remove batten and inspect conditions of each batten.

8 | Lay COOLMAX insulation foil.

9 | Install batten at new spacing depending on roof tile profile.

10 | Dismantle gutter and fascia board. Replace if necessary.

11 | Lay new Terreal roof tiles.

12 | Install ridge tree and ridges using Terreal Dry Fix.

13 | Install wall flashing using Terreal Dry Flash.

14 | Install socket and lantern for ventilation outlet.

15 | Gathering, clearing of rubbish and debris.

16 | Roof inspection by Terreal and delivering Terreal warranty certificate.
